# MININGSTOCKS

# GOLD GOES WITH THE PORPHYRY

Discovery of Great Importance Made in Stateline Country.

RICH ROCK IN NEW YORK

MATERIAL CONSIDERED WORTH-LESS CARRIES THE VALUES.

to the front with the biggest and rich- Rhye est strike made in this country since

## been made in the past two weeks, the whole country is aroused and every-body is looking into the porphyry. Strike Made by Accident.

E. H. Hackett, superintendent of the Newport-Nevada, has been doing considerable prospecting of late, and recently went into a shaft on his company's ground sunk in 1899 by James McFarlane for A. W. McCune, who at that time had a bond on the Homestake group, and tore out the lagging to see whether the values, which were good at the surface, had played out, as it had always been supposed. At a depth of forty feet he started a drift to the south in a mass of ledge matter consisting of a quartz porphyry. At the south in a mass of leage matter consisting of a quartz porphyry. At the surface the ledge was all quartz, but at this depth it had changed to the quartz-porphyry, and, no doubt, was never tried for values on account of

#### Full Face of \$55 Ore.

Full Face of \$55 Ore.

Mr. Hackett was not pleased with its appearance, but thought he would put the rock to the fire test, and was surprised to find that the whole width of the drift, which is not all of the vein, went \$55 in gold. He could hardly believe that the results were correct, but later checks have proven that the values are there, as the lowest assay made from a portion of the ledge went \$37. Just how wide the vein is has not yet been ascertained, but it will be thoroughly prospected at oncount forty-foot level, where it was discovered, and from a greater depth in the shaft.

#### This Vein Richer Yet.

This Vein Richer Yet.

This find in itself would be great news to the stockholders, but it is only half of the story, for a still richer find has been brought to light in another part of the property. In the face of the main tunnel, in a distance of about 700 feet, Mr. Hackett started a 'cross-cut to the east to prospect for what he calls the east ledge. A few days ago he cut into a body of quartz-porphyry and sampled it, getting \$16 in gold. This was thought to be pretty good, but after cutting through the mass a distance of five feet a close average sample made yesterday went \$104.80 in gold.

Mr. Hackett is pushing the cross-cut and has no idea what width the vein will be. He will also commence drift-ing north and south and will upraise to the surface, a distance of 175 feet.

A twenty-five-ton mill is thoroughly equipped and ready to start within an

#### Mineral Belt Miles in Length. There are miles of this belt that will

no doubt yield just as good results with prospecting. The whole country between Deer Lodge and Stateline is composed of the same materia! as at the Homestake and the Beck-Miller property, where the late big strikes have been made, and yet there is not half a dozen locations in the whole property, where the late big straws have been made, and yet there is not half a dozen locations in the whole region. It is covered with float, but has been passed up by the prospectors. Men are getting in there now and there is no doubt that the whole country will be thoroughly prospected.

## Porphyry Dykes at a Premium.

Porphyry dykes are at a premium, and the old-timers are looking up their ground and doing something besides panning for the values. The Jennie Gold Mining company has a large dyke that it has worked for some time, but values have been looked for only in the quartz. A couple of men will be put on at once to cross-cut the dyke to ascertain what there is in it. At the Wild Irish-Amethyst Messrs. Newell and Moore have recently found some

to ascertain what there is in it. At the Wild Irish-Amethyst Messrs. New-ell and Moore have recently found some big values in the same character of rock as the Homestake find, but no work has been done to ascertain the extent of it.

New arrivals are coming into camp every day in search of properties, and all have been through the boom country to the southwest. So far every one of the newcomers has declared that he has not seen a country with such surface showings as exist here, both for size of ledge and values.

With values in the quartz, the spar and now the porphyry; with miles of ledges; with good water and plenty of it; with an abundance of timber; with good roads and only fifteen miles from the Salt Lake Route, at Modena, great encouragement is felt over the outlook.

#### LOWER MAMMOTH STRIKE.

## Full Breast of Good Ore Is Encoun-

tered on 1,400 Level.

Developments on the 1,400-foot level of the Lower Mammoth, at Tintic, are responsible for the sharp advance in the market price of the company's shares since Tuesday morning. Manager John Dern was advised of an interesting change in the north drift of that level Monday evening, but his absence at Bingham with the Los Angeles visitors on Tuesday kept him from learning anything additional until Tuesday night.

"I was then informed by Superintendent William Ball," said Mr. Dern yesterday, "that the entire face of the drift was in ore, assays upon which gave quite encouraging values in both gold and silver. The superintendent also informed me that in one side of the drift quite a large streak, a foot or more, of copper ore had made its appearance and that conditions seemed most favorable for the development of something really good. It is a little too early yet to draw conclusions from the assay returns, so it is better that they be not given at this time. I will say something really good. It is a little too early yet to draw conclusions from the assay returns, so it is better that they be not given at this time. I will say, however, that the copper streak shows an average of better than 3 per cent in that metal. Considerable drifting has been done in the direction stated on the 1,400 level and a gradual improvement in the character of the rock has been noted. We feel very much

encouraged over the prospects at that point and still better news may come

point and still better news may come from it before long."

Manager Dern also stated that on Tuesday night there remained only two sets of timbers to place until the shaft would be ready to permit of operations in it being commenced. It will likely be finished up by this time and sinking for the 1,500 level will have been commenced.

#### GOLDFIELD DOWN TO BUSINESS.

While Rush is on to Other Sections Work is Being Systematized.

(Special to The Herald.) Goldfield, Nev., June 13 .- All travelers to the Bullfrog district, with few exceptions, pass through Goldfield, and most of the operators in the southern country make their headquarters in Goldfield. On the other hand, all Gold-field merchants and brokers are open-(Specal to The Herald.)

Fay, Nev., June 13.—Deer Lodge is the front with the biggest and richest strike made in this country since

the days when the Johnny startled the mining world with its wonderfully rich ore, and the Newport-Nevada company is the lucky finder. The strike is important from several standpoints, the principal one being that it has opened up wonderful possibilities in this great mineral belt, extending from Stateline to Pike's Diggings, for, like the recent Beck-Miller strike at Deer Lodge, the values lie in the porphyry or a quartz-porphyry. The immense dykes of porphyry that traverse this country have never before been prospected for values. down to sun rise, and none of the local saloons close throughout the night. All kinds of money are in sight, and those who come to Goldfield with little

those who come to Goldfield with little or no capital do not last long. Living is more expensive than in any city, but the best that the world's markets afford are to be had here. A French restaurant table d'hote at \$1.50 per plate, and an a la carte restaurant with string music to acompany are crowded to the doors at meal hours. crowded to the doors at meal hours.

The climate here is about equal to orado Springs, which is in the same altitude. The days are as warm as spring days in the east, and the nights are as cool as late fall days in the east.

#### DEAL IS UNCOMPLETED.

Purchasers of Latham Properties Leave to Inspect the Mines.

The shareholders of the Latham Min ng company have taken the action ecessary to legalize the sale of the company's mines to the Ohio Lead

ligent management and ample capital can command. The greatest handicap the property has ever had has been its isolation from the ore markets. Now that the building of the Western Pacific is no longer in doubt, and as that line will pass within a dozen miles of the ground, everything is now favorable to early and substantial results.

## GOES TO THUNDER MOUNTAIN.

Salt Laker Takes Superintendency o Sunnyside Mines and Mill.

Without giving an inkling of what he ntended doing, Captain John Treweek, quietly slipped out of town something over a week ago and left for Nampa

over a week ago and left for Nampa and the Thunder Mountain country, where he has accepted the superintendency of the Belle of Thundrer Mountain company's great Sunnyside mines and milling plant. His arrangements were made in advance with General Manager R. W. Purdum, who was seeking a successor to Superintendent E. L. Abbot, who had asked to be relieved in order that he might leave and go into business for himself.

That Captain Treweek will be at home in his new position is guaranteed by his long experience in the management of gold propositions both in this country and in Australia. About eighteen months ago Captain Treweek had closed arrangements to go to Siberia to take charge of a big gold proposition for an American syndicate, but the war between Russia and Japan took on such proportions about that time that the proposition had to be abandoned, at least for the time.

The Sunnyside mill was started upon the 5th and word form Carveil.

The Sunnyside mill was started up in the 5th and word from Superinten-ent Abbot, who left camp a few days later, advised Manager Purdum that everything was running smoothly and that everything had been left in ship-shape for his successor.

## W. A. WILSON HAS NEW SCHEME.

Organizes Company to Operate Mines on Wood River.

Since Engineer W. A. Wilson has acquired certain properties in the Wood River country, including the Eureka and November lodes, at Bullion, above Hailey, the Eureka Development company, with a capital of 200,000 50c shares has been organized to operate the properties. Articles of incorporation have been filed at Hailey.

W. A. Wilson is designated as president and treasurer; E. B. Critchlow.

W. A. Wilson is designated as president and treasurer; E. B. Critchlow, vice president, and W. J. Barrette, secretary. H. P. Henderson and A. C. Ellis, jr., are the other directors and incorporators. One-half of the capital stock has been placed in the treasury to provide a working capital.

As manager of the Quincy Junior company, present the state of the property of the propert

as manager of the Quincy Junior company's properties in the same dis-trict, Mr. Wilson has acquired a first-class knowledge of the ground and it is safe to predict that he will not be long in bringing the Eureka company's property to the front.

## Ore and Bullion.

Ore and bullion settlements in this city cesterday, as reported by McCornick & Co., amounted to \$77,600, as follows; Silver, ead, gold and copper ores, \$29,700; base bullion, \$47,900.

## Metal Markets.

Silver, 58½c per ounce, Copper, (casting), 14½c per pound, Lead, in orc, \$3.50; New York, \$4.50 per 30 pounds.

## Mining Notes.

The mining exchange closed yesterday afternoon to permit its members to enjoy "flag day" exercises. Secretary J. H. Deming, of the New York Bonanza, has gone over 10 East canyon to try out his fishing tackle to-day.

day.

Five cars of ore from Bingham, five from Nevada and one from Lehi were reported at the Taylor & Brunton sampler yesterday morning.

Superintendent James Hickey of the Comstock came down from the Park Tuesday night calculating to return this morning. He said there was nothing concerning conditions at the Comstock mine

to have the mill in commission soon.

Ore shipments from Tonopah last week were as follows: Tonopah Mining company. 954 tons; Tonopah Extension. 304 tons; Montana-Tonopah, 295 tons; Midway. 61 tons; Belmont. 180 tons; Nevada-Alpine. 29 tons; W. F. Grove. 48 tons and Goldfield Sampling company. 73 tons.

Tonopah Bonanza: A large party of brokers will leave here this morning for a trip to the great Kawich district. They will be the guests of the people of that booming town. The trip will be made in automobiles and will be free of expense to the excursionists. This is another step toward advertising that great section and shows the public spiritedness of the citizens, who are subscribing generously to the fund which is being raised for the purpose of entertaining their guests in a most lavish fashion.

Tonopah Miner: M. L. Effinger, half owner of the Lockout mine in Fish Lake 206 \$23\\\2 \$23\\\4 \$23\\\4 \$23\\\6 \$25\\\4 \$23\\\4 \$2

guests in a most lavish fashion.

Tonopah Miner: M. L. Effinger, half owner of the Lookout mine in Fish Lake valley, came up from that camp Wednesday and reports the showing in his property to be of the most encouraging character. The incline shaft is down 425 feet, at which point the ore body is twelve feet between walls and will average about \$\frac{90}{20}\$0 a ton, with a twelve-inch streak which gives assays as high as \$1.400 a ton. The half interest of George E. McClelland in this property was recently purchased by John McKane, Dr. Edward Bowes and J. Sloat Fassett. It is the intention of the new management to operate the mine on a large scale.

Hardie's Uintah Reservation Town-ship map and guide, 15 cents coin at book stores or 314 So. 2d West St.

#### LOW RATE EXCURSIONS TO THE SEABOARD

Via New York City with privilege of stop-over on return trip.
